DEBANJAN NAG

Full-Stack Developer | Data Analyst | Cybersecurity Researcher

debanjannag143@gmail.com | +91-9002967842 | LinkedIn: debanjan-nag-9b465928 | GitHub: thegamerslayer | Kolkata, India

EDUCATION

Bachelor of Computer Application (BCA) — Institute of Engineering and Management, Kolkata *July 2023 – July 2026*

CGPA: 8.5 / 10 | Class XII: 79% (WBCHSE 2023) | Class X: 89% (WBBSE 2021)

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Java, Node.js, Express.js, React, TypeScript, HTML5, CSS3

Data & Analytics: SQL, Python (Pandas, NumPy), Tableau, Power BI, Excel

Databases & Tools: MySQL, JWT, REST APIs, Hyperledger Fabric, Git, AWS, Docker, Linux

Soft Skills: Problem Solving, Team Collaboration, Communication, Decision Making, Troubleshooting

WORK EXPERIENCE

Cybersecurity Research Intern | CCoE – UEM (University of Engineering & Management) *Sep 2024 – Sep 2025 · Kolkata*

- Architected DEChain, a private blockchain-based digital evidence management system using Hyperledger Fabric & Hyperledger Composer, enabling tamper-proof chain-of-custody for law enforcement.
- Engineered smart contracts (chaincode) for evidence registration, custody transfer, integrity verification, and audit logging with SHA-256 cryptographic hashing.
- Implemented role-based access control (RBAC) for law enforcement, forensic experts, and legal professionals; achieved evidence registration latency of ~18–23 ms and verification of ~8–9 ms.
- Co-authored and published research findings in a Springer Nature indexed conference proceeding.

PROJECTS

Financial Transactions Analytics Dashboard *SQL · Excel · Tableau*

- Analyzed a multi-year, multi-million-record financial dataset; developed KPIs including Net Revenue, Total Transactions, and YoY Growth, and built an interactive Tableau dashboard to surface seasonal trends.

Blinkit Retail Sales Analytics Dashboard *SQL · Excel · Power BI*

- Processed 8,500+ products totaling $1.2M+ in sales; designed interactive Power BI dashboard with KPI cards, outlet-tier revenue analysis, and dynamic filters for category-level product distribution.

Omni-Ticket – Universal Ticket Booking Platform *React · TypeScript · Vite · Node.js*

- Built a full-stack universal booking platform (events, movies, concerts, travel) with a React + TypeScript + Vite frontend and RESTful Node.js backend; focused on responsive UI and optimized build performance.

Universal Pipeline – Modular Data Framework *Python · Pydantic · Docker*

- Developed a modular data engineering framework with a configuration-driven Python backend to automate web scraping and data transformation; focused on dynamic schema validation and optimized pipeline flexibility.

CERTIFICATIONS & RESEARCH

- **Deloitte (Forage):** Tableau dashboard development, Excel-based data classification, and business insight generation from structured datasets.
- **Bank of America (Forage):** Client strategy development, translating financial objectives into actionable solutions, and stakeholder communication.
- **Published Research:** DEChain – Blockchain-Based Digital Evidence Management System, Springer Nature Indexed Conference Proceeding, 2025.
